

Waterborne basecoat system

Spectral WAVE 2.0

Product symbol SA-000 - SA-710	Product name Solid base pigments
SA-812 - SA-828	Aluminium pigments
SA-832 - SA-834, SA-864	Aluminium colour pigments
SA-900 - SA-951	Pearl pigments
SA-980 - SA-998	Multi-colour pearl pigments
SA-P10 - SA-P67	Special pearl pigments
SA-X10 - SA-X80	Xirallic® pigments
C-00 - C-03, G-01	Powder pigments
C-844	Aluminium powder pigment
SA-D01	Flop controller
SA-D90	3CT system additive
SA-R10	Reducer
SA-R30	Reducer
SA-D20	Converter
SA-H20	Activator
T-10, T-11	INK special pigments

RELATED PRODUCTS

Spectral EXTRA W785 Waterborne degreaser

PROPERTIES

- High yield
- High concealing power
 - Excellent drying
- Easy application and shading
- VOC compliance acc. to Directive 2004/42/EC
- Can be applied in one-coat systems on external and internal vehicle surfaces

Technical Data Sheet

13.02.2024

SUBSTRATE PREPARATION						
SPECTRAL acrylic primers and SPECTRAL epoxy primers	- dry power sand with pre-sanding: P3 finish: P400-P50 ralternatively: wet sampre-sanding: P6 finish: P800 Degrease with EXTF Wet-on-wet variant	Filling or priming variant: - dry power sand with: pre-sanding: P320-P360 finish: P400-P500 or grey abrasive needle cloth - alternatively: wet sand by hand: pre-sanding: P600 finish: P800 Degrease with EXTRA W785. Wet-on-wet variant: - See the Technical Data Sheets for SPECTRAL primers				
Existing OEM finish		Dry power sand with P400-P500 or grey abrasive needle cloth. Thoroughly degrease with EXTRA W785.				
SPECTRAL GREY SYSTEM						
P1	P2	P3	P4	P5		

Using the Spectral Grey System for substrates:

- produces a substrate colour for optimum coverage;
- increases the basecoat yield and better rendering of the colour.

See the CarColor programme for the recommended spectral grey value.

If this information is unavailable in CarColour, use the default P3 (grey) primer.

RECIPE PREPARATION

Shake vigorously:

- for 1 minute minimum, if the container's factory seal is unbroken;
- for 30 s minimum, if the container is open.

Mix the components of Spectral WAVE 2.0 in a plastic container.

Mix the batched ingredients thoroughly.

Keep the unused basecoat in a tightly closed plastic container. Storage temperature: +5°C - +30°C. Avoid exposure to sunlight.

Perform a test spray to verify the colour match before the actual repair.

CAUTION:

Do not mix INK T-10/T-11 pigments with any pigments of the Spectral WAVE 2.0 base system.

Use with clearcoats only and strictly according to the CarColor program recipes.

APPLICATION CONDITIONS

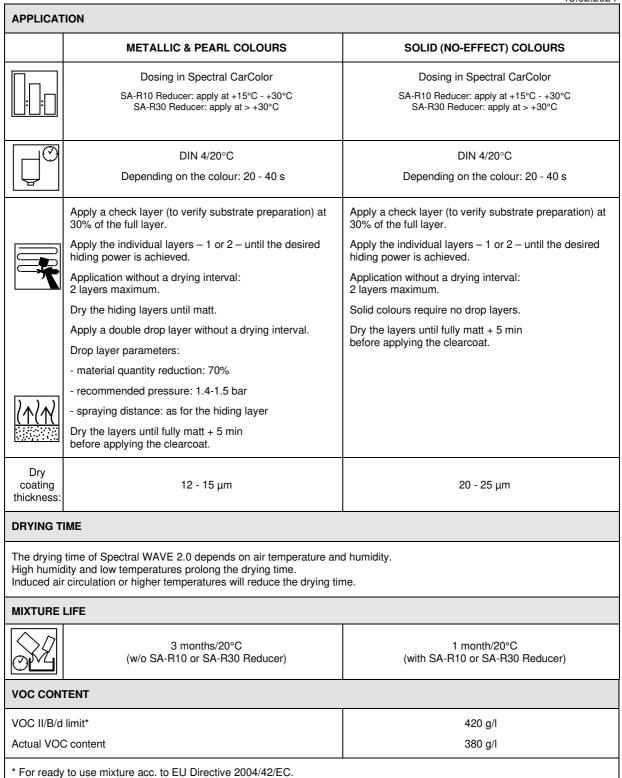

It is recommended to apply SPECTRAL WAVE 2.0 at over $+15^{\circ}\text{C}$ and at a humidity of 80% or lower.

Low-pressure spray gun or high-pressure gravity fed spray gun		Nozzle	Pressure
	Recommended: Low-pressure gravity fed HVLP spray gun	1.3 mm	See the spray gun manufacturer's recommendations

ONE-COAT SYSTEM

Possible applications:

- external surfaces: mouldings and bumper fascias
- internal surfaces: engine compartment interior

The coat is resistant to engine oil, petrol, and other chemicals, as well as the elements, including water and UV radiation.

Note: The actual colour may differ from the colour chip.

Shake vigorously:

- for at least 1 min before using the factory-sealed container;
- for at least 30 s when using the can again.

Batch at the correct mixing ratio:

Finished colour match 70 parts / grams SA-D20 30 parts / grams

Mix and add the following:

SA-H20 10 parts / grams

Dilute with SA-R10 to the required spray viscosity.

DIN 4/20°C: 20 - 40 s

Application:

Apply the individual layers — 1 or 2 — until the desired hiding power is achieved.

Dry until flat in appearance.

Mixture life at 20°C: 1 h

EQUIPMENT CLEANING

Pre-clean with water, clean thoroughly with a solvent (e.g. NC).

STORAGE CONDITIONS

Store in a dry room at above +5°C. Avoid direct exposure to sunlight.

SHELF LIFE

Spectral WAVE 2.0 Factory sealed containers	24 months/20°C
Spectral WAVE 2.0 Once unsealed and opened	6 months/20°C
C-00 to C-03	10 years/20°C
C-844	10 years/20°C
G-01	36 months/20°C
T-10/T-11	12 months/20°C
SA-H20 Activator	12 months/20°C

SAFETY

See the Safety Data Sheet.

OTHER INFORMATION

Registration number: 000024104.

The effectiveness of our systems results from laboratory research and many years of experience. The data contained herein meets the current knowledge about our products and their application potential. We ensure high quality, provided the user follows the instructions and the work is performed in accordance with good workmanship. It is necessary to perform a test application of the product due to its potentially different reaction with different materials. We may not be held liable for defects if the final result was affected by factors beyond our control.
