NOVOL MIX & SPRAY

The Novol Mix & Spray disposable paint cup system helps to make spraying easier and faster and to save coating material. The primer or coat can be mixed in the Mix & Spray cup, fixed to the spray gun and sprayed, and the used cup can be simply discarded after use. The flexible inner cup shrinks as the material is sprayed. This prevents vacuum in the cup and ensures even application of primer or coat in any gun position. Adapters, available in stainless steel and plastic, ensure compatibility of the Mix & Spray system with the most popular spray gun models on the market.

THE SET INCLUDES:

- 20 x disposable plugs
- 1 x reusable clamping ring
- 50 x disposable lids with integrated strainers
- 50 x disposable inner cups (soft)
- 1 x reusable (hard) outer cup

CHARACTERISTICS:

- Helps to save time when washing reusable cups and reduces the amount of solvent used for washing
- Mixing of the material and spraying is done in the same cup, so each time the user saves 1 traditional mixing cup
- Allows you to spray evenly while holding the gun in any position
- Cardboard box as a convenient organiser/dispenser that helps to keep the workshop tidy and prevents dust and dirt from contaminating the cups and strainers
- Unused one-component product can be stored in a cup sealed with an airtight plug
- Adapters allow the Mix & Spray system to be attached to the most common types of spray guns

Notice:

The effectiveness of our systems results from laboratory research and many years of experience. The data contained herein meets the current knowledge about our products and their application potential. We ensure high quality, provided the user follows the instructions and the work is performed in accordance with good workmanship. It is necessary to perform a test application of the product due to its potentially different reaction with different materials. We may not be held liable for defects if the final results were affected by factors beyond our control. NOVOL reserves the right to improve the product and modify the technical requirements, which may entail modification of the specification. This product is not hazardous if used as intended.

- 1

Insert the soft cup into the hard cup
- 2

Pour and mix
- 3

Attach the lid and screw on the clamping ring
- 4

Choose the right adapter for your gun
- 5

Attach the set to the gun
- 6

Spray
- 7

Unscrew the adapter with the gun
- 8

Discard used soft cup and lid
- 9

Conveniently store the rest of the system components

Material used:

Outer cup (hard)	Polypropylene (PP)
Clamping ring	Polypropylene reinforced with fibreglass (PP & Fibreglass)
Inner cup (soft)	Polyethylene (LDPE)
Lid with strainer	Polypropylene (PP)
Plug	Polypropylene (PP)
Plastic adapter	Polyamid reinforced with fibreglass (PA & Fibreglass)
Steel adapter	Stainless steel

Shelf life; storage and application requirements:

Store in a dry and well-ventilated place at 0–25°C. Protect from frost and direct sunlight. The product retains its best properties for 24 months from the date of manufacture provided that it is stored according to the manufacturer's recommendations.
