PAPER SPRAY SAMPLE

P/N: 39518 (300000025)

Product overview:

The paper spray sample helps with correct basecoat colour matching. One side of the product has a black and white chequered pattern to evaluate the colour opaqueness. The reverse features bands in shades of grey (white, light grey, medium grey, dark grey, and black) to assess the impact of the substrate colour on the colour finish. It helps reduce the processing time, effort, and costs of rework during the later coating stages.

Characteristics:

- A set of 50 paper spray sample sheets
- Two-sided pattern samples for testing the sprayed colour opaqueness and the impact of substrate colour on the colour finish
- For processing with water-borne and solvent coating systems

Technical data:

	Value
Material type:	Paper, grammage 300 g/m ²
Single sheet size:	140 x 205 mm
Sheets in set:	50 pcs.
Quantity in bulk packaging:	40 pcs. per box

Shelf life; storage and application requirements:

Store the product in a dry, well-ventilated place. Keep away from direct sunlight. No shelf life applies if stored under the specified conditions.

Please note:

The effectiveness of our systems results from laboratory research and many years of experience. The data contained herein meets the current knowledge about our products and their application potential. We ensure high quality, provided the user follows the instructions and the work is performed in accordance with good workmanship. It is necessary to perform a test application of the product due to its potentially different reaction with different materials. We cannot be held liable for defects where the final results were affected by factors beyond our control. NOVOL reserves the right to improve the product and modify the technical requirements, which may entail modification of the specification. This product is not hazardous if used as intended.
